**HR POWER ENGINEERS**

## ABOUT **HR POWER ENGINEERS**

**HR Power Engineers**, one of the leading Building Service Project Company, combine with extensive knowledge, experience and commitment ensure that we constantly meet and surpass the service level expected by our clients. HR Power Engineers with a highly motivated and experienced team of Managers, Engineers and skilled Technicians backed by a large pool of equipment and strong financial resources, is fully equipped to undertake speedy execution of Projects on turn - key basis with highest degree of professionalism.

Project Execution can be complex and demanding. The Prime requirement of co-ordination of many skills, trades and handling the complete project with an experienced and trusted source is what HR Power Engineers Offers. Our extensive experience in design, installation and supports of all aspects of building services give us an unbeaten edge over our rivals. We believe in, working in close partnership with end user organizations, contractors and facilities management companies.

*HR Power Engineers has demonstrated and proven capability of its' expertise in speedy execution of Projects that include survey, design and procurement of Fire Fighting System, Mechanical Piping for Building and Plants, Plumbing System, Super MS Structures, Compressor Installations, HVAC System, high voltage equipment installations, cabling, LV distribution network, substations, captive power generation plants, auto synchronization, industrial electrification, internal and or external lighting, Bulk storage Tank installations, Specialized Acoustic lining work.*

Of course, we can offer any of these services individually but our real strength lies in our 'Total Project Management' capabilities. With our expertise as 'Principle Contractor' we can take full responsibility for your whole project - with all the benefits it brings to the client.
